

## The CODE-DE Cloud

### Help and Trainings

CODE-DE offers a variety of support for users. For example, different online training courses are provided on a regular basis. Within the section "Training" on the help page the presentation slides can be downloaded shortly after the respective event. Additionally, there is a link to the recordings of the individual trainings.

Beyond the training dates published, CODE-DE users can also request individual dates in their own premises.

The CODE-DE support service also includes online available information such as manual, FAQ, glossary and a growing library of e-learning modules. A German and English speaking helpdesk is available by e-mail and telephone (on weekdays from 9:00 - 17:00).

If you have any questions or would like assistance in registering on CODE-DE or applying for an online training seminar, please contact us.
