

Mundi provides IaaS services combined with a large offer of Earth Observation products.

Mundi IaaS cloud platform is based on the Open Telekom Cloud provided by T-Systems.

Open Telekom Cloud is an affordable, scalable and easy to use cloud infrastructure solution, based on OpenStack from T-Systems' highly secured datacenters hosted in Germany.

The Open Telekom Cloud offers a myriad of services, ranging from central cloud services such as Elastic Cloud Server, Elastic Volume Server, Object Storage and Virtual Private Cloud, to services that help users work with cloud resources in a convenient and cost-efficient manner. All this makes Open Telekom Cloud the perfect solution for Network of Resources users.
