

Training programs & certifications

Our training programs teach you the basics of the Open Telekom Cloud. Learn directly from experts, or use the professionally prepared e-learning materials. We offer you and your employees different types of learning in order to focus optimally on your specific situation and needs. You can either study the materials online by yourself, in a video conference with an expert, or directly on-site at your company premises during a workshop. For experienced users, we offer the opportunity to be tested directly and receive the certificates immediately.
